3. Revenue Forecast & Strategic Cash Flow Projection

Target Period	Projected Revenue (USD)	Model Method
Jul	\$172,667	Scikit-Learn Linear Regression
Aug	\$183,667	Scikit-Learn Linear Regression
Sep	\$194,667	Scikit-Learn Linear Regression

Executive Strategic Synthesis:

The organization's historical performance demonstrates a strong, resilient upward revenue trend that is projected to transition into a highly consistent expansion throughout the upcoming quarter. This linear regression forecast models a steady sequential growth trajectory of \$11,000 per month, pushing projected revenues to a peak of \$194,667 by September. To sustain this projected 21.7% expansion from June levels, leadership should proactively align operational capacity and optimize working capital to support this accelerating demand.
